

HIGH QUALITY HANDCRAFTED ALUMINIUM BOATS

AF 680 CAB

The AluForce 680 Cabin offers its owners all the advantages of the dynamically stable and robust Pilothouse model series. Even in **heavy, rough water** it convinces with its stable and fast running. The cockpit and cabin are generously dimensioned and can be equipped with an optional powerful independent heater. With room for up to **6 adults**, the AluForce 680 Cabin is a **real space miracle**. The tarpaulin **rear wall behind the cabin** or an optional solid and lockable door provide protection from the elements and allow easy access from the helmstand to the cockpit. There is also ample space for fishing gear or equipment and **sleeping space for two people**. The traditionally built hull of the AF680 with its deep V-shape is designed for outboards with up to 175 hp. It can be **easily trailered** with smaller cars.

6 persons, 2 beds

dynamically stable and robust

real space miracle

easily trailered

Length of hull:	6,06 m
Length overall:	6,73 m
