

HIGH QUALITY HANDCRAFTED ALUMINIUM BOATS

## AF 570 CONSOLE

The new AluForce Centerconsole series impresses with its extremely high quality and innovative manufacturing. Approved **for 5 persons**, the Aluforce 570 Console is characterised by one of the most stable and at the same time lightest hulls on the market. With an empty weight of **only 650 kg**, the 570 can also be **easily transported** with smaller cars. Extremely flow-optimised, the boat can also be driven very sportily with smaller engines and is particularly suitable for inland waters or even open waters close to the coast. **For speed lovers**, the 570 can be powered by up to 140 hp. The slightly higher side of the boat and **extra high railing** offer additional protection for families with children. The front bench seat can be converted into a sunbathing area and **comfortable sun deck**.

Length of hull:	5,32 m
Length overall:	5,67 m
Width:	2,10 m
Dry weight:	650 kg
Height of the boat:	1,36 m
